Welcome to the Engineering Ranking website.

Important notes:

- The information on the Engineering ranking website is unofficial and does not appear on official University documents, such as letters of registration or transcripts
- Only full-time students are included in the ranking
- The ranking is based on sessional average
- For students with identical sessional averages, the ranking is determined using cumulative grade point averages (CGPA)
- No updates will be made once the list is posted

It's important to note the Engineering ranking is unofficial and not a competition. The ranking allows students to personally reflect on their grades in comparison with other students in their programs of study. If you are concerned about your ranking and would like to learn study skills to help you improve your grades, you're encouraged to connect with your academic advisor to discuss options within the Faculty: <http://uoft.me/engcounselling>.
